Projects

E-commerce SAAS System

This project is a personal project I build using Laravel(PHP framework) for the backend and Vue.js(Javascript Framework) to render some pages. It is a system that offers users access to make personal E-commerce management within 5min.

Features offered on the platform are

- Product Management
- Order Management
- Delivery and coupon service.
- Online order and WhatsApp order.
- Custom Domain
- Payment Gateway Integration(Stripe, Flutterwave)
- KYC Verification
- SEO Management.
- Wallet System.

And much more will be added to it later.

GoodGate Finance Web Application, A loan application and investment platform for both salary and business earners usiness owners.
